1. BRUNEI SAR 81 — 11. 8. 51.

Para 1 of Residents' memo: ~~the change~~
the system on which oil royalties are
now paid is this — in place of the
old rate of 2/6 per ton, the State
now takes 10% of the oil produced
in kind, & sells back the oil to
the Company at prices agreed from
time to time. This system together
with a considerable increase in
production has resulted in a very
considerable (almost fantastic)
increase in revenue.

The financial position of the
State continues to improve, & my
only comment is 'O fortunate Brunei'.

Have you any thoughts we might
pass on in reply to (1)?

G.C. Whitley 23/8.

32

Could not the Estimates with the
Budget Readings every memo, be
forwarded ~~as soon as~~ to us when
received by the H.C. and a despatch
follow at a later date after the
Estimates have been examined in the
H.C. Office? This would ^{have} prevented a delay of 7½ months
in the receipt of the 1951 Estimates.

I imagine Borneo's position must
be unique in the Colonial Empire
with surplus funds equivalent to ^{over} ~~about~~
3 years expenditure and no public debt.
In view of this, would it be possible
to suggest to the H.C. that the
Sultan in Borneo might like to consider
making a ~~sub~~ donation to the famine
relief fund?

H.C. Dept
on being
consulted
say they
wd. rather
the suggestion
was not made
to Borneo, but

if an offer
comes from Borneo
spontaneously it wd.
naturally be accepted

G.C.B.
28/8.

Mr. Sand.

L. Palmer
24/8

A brief saving in acknowledgement of 1 noting
the permanently satisfactory position & making the
suggestion in para 1 of Mr. Palmer's minute
G.C.B. 3/9.

Draft herewith.

7 September, 1951

Sir,

I have the honour to acknowledge the receipt of your savingram No.81 of the 11th August, enclosing the 1951 Estimates for the State of Brunei, together with an explanatory memorandum by the British Resident. I note the pre-eminently satisfactory financial position of the State.

2. I would suggest for your consideration that in the future the disadvantages of delay in the Estimates reaching me might to some extent be mitigated if they were forwarded, together with the British Resident's covering memorandum, soon after they are received in the High Commissioner's Office. Your observations could then follow at a later date after examination of the Estimates has been made.

I have the honour to be,

Sir,

Your most obedient
humble servant,

THE HIGH COMMISSIONER

FOR BRUNEI.

Synd: T Cook
(for the Secretary of State)

covering memorandum, ~~as~~ soon after
they are received in the High Commissioner's
Office. ~~or despatch conveying~~ Your
observations could then follow at a
later date after ~~your~~ examination
of the Estimates has been made.

I have etc.

Signed: T COOK.

(For the Secretary of State)

SAVING.453/1
8

From the High Commissioner for Brunei.
To the Secretary of State for the Colonies.

Date 11th August, 1951.

No. 81 Saving.

Two copies of the 1951 Estimates of Revenue and Expenditure for the State of Brunei, together with an explanatory memorandum by the British Resident, are transmitted herewith. 10 further copies of the Estimates will follow by surface mail.

2. Although the General Revenue Balance surplus at the 1st January 1950 appears from the statement on page 5 of the Estimates to have fallen short of the figure of \$7 $\frac{3}{4}$ million which was originally estimated to be the probable amount of this surplus, this is due to transfers to the General Reserve Fund to a total of \$4 million, and the balances of surplus funds at 1st January 1951 were expected to stand at \$21,200,000 approximately. They actually stood at just over \$23 million.

3. As in 1950, the Estimates of Revenue have proved to bear little relation to actual events, mainly in connexion with the State's principal source of income, the oil industry. The revenue from Royalties, which was originally estimated at \$6 $\frac{3}{4}$ million for 1950 is shown in the revised estimate in the 1951 document as expected to exceed \$13 million. Latest returns show that, as only one half-yearly payment was received during the year, this revised estimate was only slightly exceeded. In 1951 this revenue will be still higher: the \$21 million estimated for may well be exceeded and, in addition, there will be receipts (covering two years of assessment) of income tax of approximately \$40 million, as against the one million dollars for which the 1951 Estimates provide.

4. Although these Estimates envisage expenditure on a considerably larger scale than was allowed for in the Estimates for 1950, especially in the sphere of Public Works, it will be noted that a large proportion of the Public Works Extraordinary expenditure is allocated for two major works - a scheme for installing a water supply at Belait and the construction of new offices in Brunei itself. The unrealistic nature of the revenue estimate has, however, also been reflected on the expenditure side, where considerable additional provision has had to be made during the first half of the year, both on account of necessary expenditure which had been overlooked when the Estimates were prepared and also on account of considerable underestimation of the cost of schemes included in them. Although a very much greater surplus will be achieved than that foreseen in these Estimates, it would be unsafe to hazard a guess at its amount.

5. It may well be that, apart from the actual provisions in the Brunei Estimates, their setting-out could be improved upon; but it is necessary to make it clear that the extent to which the High Commissioner's office is at present physically able to assess, supervise, advise or report upon Brunei financial matters is strictly limited. Owing to preoccupation with Sarawak affairs, my financial advisers were unable to give adequate guidance at the time of the preparation of the Estimates or to prepare sooner a covering submission to you. My approval of the Estimates has, rightly, been assumed; but has not formally been given. For these deficiencies I apologise, and I had hoped that they might be obviated for the future by the creation of a new post of Deputy Financial Secretary in Sarawak, which would certainly have enabled Brunei to receive more of the attention which is its due. This request has, however, been refused, and I am consequently unable to offer any definite prospect of an improvement of the present state of affairs.

SU

STATE OF BRUNEIEstimates of Revenue and Expenditure 1951MemorandumI. Revenue.

The salient feature both of the Revised Estimates for 1950 and the Estimates for 1951 is the phenomenal rise in the Revenue figures due to the new agreement with the British Malayan Petroleum Co. Ltd. regarding prices on which Oil Royalties are based.

As a result of this the anticipated surplus of \$1,081,200 for the current year will be increased to nearly \$9 million while the 1951 Estimates budget for a surplus of over \$15 million despite a considerable increase in Expenditure especially in Public Works Extraordinary.

As a result of the general prosperity Customs Revenue also continues to expand. So far nothing has been collected under Income Tax but a substantial sum is expected in 1951.

The other items of Revenue call for no special comment.

II. Expenditure.

Expenditure on Personal Emoluments and Annually Recurrent items remains reasonably constant but the latter is swollen by the recently approved increase in the scale of cost of Living Allowances, which is inevitable in present circumstances and which the Government can well afford.

(a) Turning to individual Departments the large increase under the heading H.H. the Sultan will be noted.

This is due to the increase in the Privy Purse approved by the Secretary of State and to the necessity to equip and maintain fittingly the new palace which is now under construction.

I need not emphasize the importance of the fact that His Highness should at last be properly housed and able to maintain the dignity of his position.

(b) The increase under Customs and Marine is entirely due to the need to provide more extensive sea communication with Labuan, which is Brunei's door to the outer world and to this end 3 new launches are being built to replace the worn-out craft which were a legacy of the B.M.A.

(c) Under Education provision is made for English teachers recruited from the U.K. and it is hoped that English education will at last get under way despite the difficulties which have up to now been encountered.

(d) The increase under Electrical is due to the need for additional plant in Brunei Town and for new plant in Kuala Belait where up to the present electricity has been supplied by the Oil Co. It is proposed that Government should now take on this service which is only right and proper. It will be revenue producing.

(e) The Fisheries Research experiment has proved a failure and it is proposed to abandon it as soon as the agreements of officers serving under it expire.

(f) Under Miscellaneous Services Special Expenditure - a sum of \$200,000 has been provided to cover the salaries paid to officers on the Malayan Establishment who were serving in Brunei at the time of the Japanese invasion and were subsequently interned.

The Brunei Government has agreed to accept this liability and make a refund to the Malayan Governments.

(g) The increase under Municipal is due to the new Town plans for Brunei, Belait and Seria. It is hoped that these will in due course become model townships.

(h) The increase under Posts & Telegraphs is mainly due to provision for new and improved Radio and Telephone communications which are badly needed.

(i) The programme for Public Works in 1951 is an ambitious one but now that an additional European Engineer is stationed in Brunei it is hoped that it will be possible to carry it out completely, especially in view of the large amount which has been accomplished during the current year with only one Engineer for most of the time.

Over \$5 million is a comparatively large total, but nearly \$2 million is comprised in two items viz. the Kuala Belait Water Supply and the New Offices, Brunei Town, both of which are urgent necessities.

III. General.

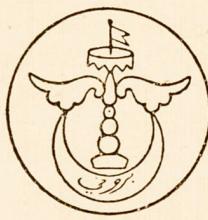

The financial position of the State is extraordinarily sound.

There is no Public Debt.

By the end of this year Reserve Funds should amount to over \$10 million with a further surplus balance of about another \$10 million. This with an anticipated surplus next year of about \$15 million and probable surplus for some years to come should enable all necessary schemes for expansion and development to be carried out from the State's own resources.

E.E.J. Putney

British Resident,
Brunei.
